SIZE MATTERS

...especially in the aerospace aluminum industry

52" Diameter Billet Tooling

2xxx Series Alloy
Ultrasonic Class AA Compliant

Size and quality were of utmost importance when Almex broke the **World Record in 2013** with the successful commissioning of **52" (1320 mm) diameter billets** in both commercial and aerospace grade alloys with its world-class billet tooling. Achievements like these have convinced aerospace suppliers for the past **twenty years** to turn to Almex as their trusted source to provide the advanced technology and know-how to meet the industry's stringent casting requirements. If Almex can meet the rigorous demands of the aerospace industry, just imagine what it can do for you.

Castool makes extrusion better.. by design

4 INDIVIDUALLY CONTROLLED HEATING ZONES EACH WITH A DOUBLE ACTING THERMOCOUPLE LOCATED EQUIDISTANT BETWEEN THE HEATING ELEMENTS AND LINER

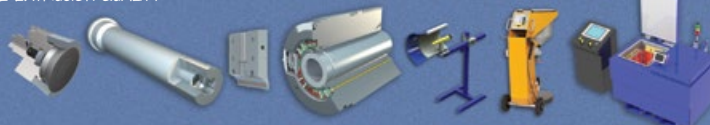

DUMMY BLOCK MAINTAINS A MINIMAL UNIFORM SKIN OF ALUMINUM ON THE LINER ID

BUILT-IN THERMAL GRADIENT ALLOWS HEAT TO DISSIPATE FROM THE LINER WITHOUT USING AUXILIARY COOLING OR AIR

PRECISE HEAT CONTROL PREVENTS UNEVEN RUNOUT LENGTHS

REPLACEABLE WEAR RING REDUCES OPERATING COST

NOTE:
CASTOOL CONTAINERS AND DUMMY BLOCKS REDUCE SCRAP, EXTEND TOOLING LIFE AND IMPROVE EXTRUSION QUALITY

CASTOOL MAKES EXTRUSION BETTER

THE NEXT EVOLUTION IN THE DIE CLEANING PROCESS

The **Automatic Die Cleaning System** from Belco adapts through a full diagnostic system and optimization tools that allow you to continuously improve its process.

The system greatly reduces operational hazards by automating many aspects of the die cleaning process which may otherwise be done manually with ventilation and protective equipment. Intelligent controls allow for job completion without re-cleaning or other hassle.

Trust your die cleaning needs to Belco's Automatic Die Cleaning System. Easy installation, reliable operation, and a safer atmosphere for your operators make the system a wise choice.
